

Wyoming Resources

Historic/Cultural

Native American encampments. Pioneer trails including the Mormon Trail, California Trail, and the Pony Express Trail. Original transcontinental railroad route. Ghost towns. Charcoal kilns. Ranching heritage.

Scenic

Intriguing views of the Uinta Mountains.

Recreational

Mountain biking, ATV and snowmobiling opportunities. Sulphur Creek Reservoir offers fishing, boating, and windsurfing.

Natural

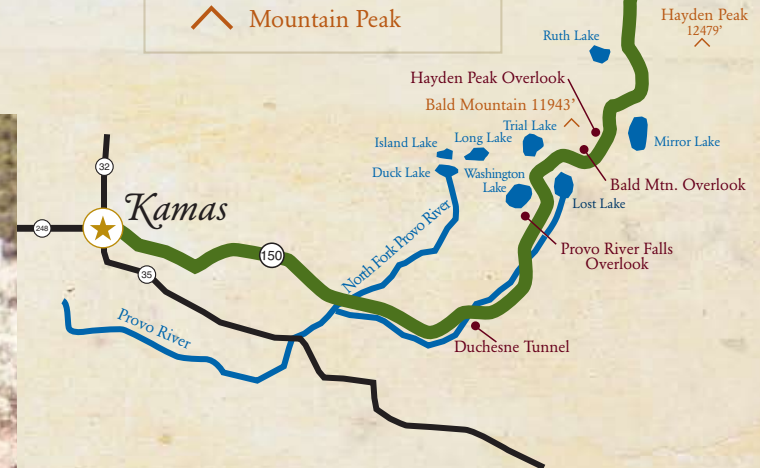

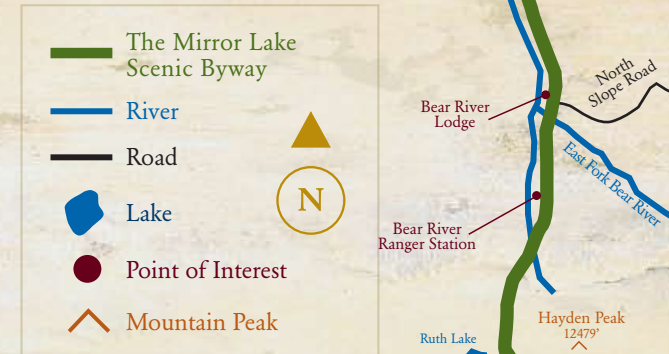

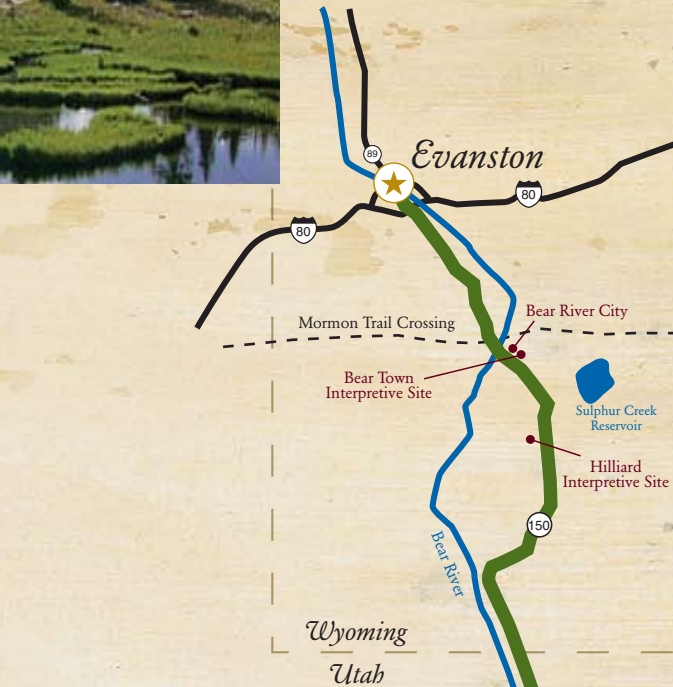

The Bear River, the longest meandering river in North America which does not flow into an ocean. Diverse wildlife and vegetation.

Byway Theme-Timeless Tracks

The theme, Timeless Tracks, represents natural and man-made tracks. The Bear River is the longest natural track along the byway. Tracks have been made by animals, Native Americans, mountain men, pioneers pulling handcarts or guiding wagons, homesteaders, tie hack workers and the water flumes that were built, and by gandy dancers who constructed the transcontinental railroad.

Tracks continue to be made by those who live adjacent to the byway and by visitors. Travel with us through time along the Mirror Lake Scenic Byway from Evanston, Wyoming to Kamas, Utah. Experience history, culture, natural and scenic wonders, and recreational opportunities. Make your own tracks as you enjoy one of America's most unique scenic byways!

Wasatch-Cache National Forest

Recreation Fee

A fee is required for recreational use within the Mirror Lake fee demonstration area. 100% of the revenue generated is returned to the area where it is used to maintain and enhance visitor services, recreational facilities, and the protection of natural resources.

Utah Resources

Historic/Cultural

Legends of lost Spanish gold mines. Tie hack cabins.

Scenic

Panoramic views and vistas of the Uinta Mountains.

Recreational

Abundant opportunities in the national forest for hiking, backpacking, camping, hunting, fishing, boating, horseback riding, mountain biking, ATV use, snowmobiling, and XC skiing.

Natural

Geology of the Uinta Mountains. Wasatch-Cache National Forest. High alpine rivers and lakes. A variety of flora and fauna.
